Company Profile

Success Story

We, Iblesoft Inc, an ISO 9001:2000 certified organization, have carved a niche for ourselves in the arena of development of IT business solutions or Web or Software Applications. Over the past ten years, we have worked on as many as 400+ projects for our clients across the globe.

Our team of developers has successfully developed products and solutions with clear cut ideologies and functionalities as per the most complex requirement of our clients.

Today, our enviable position as one of the trusted solution providers is the sole outcome of our dedication and enthusiasm which we instill in the services we deliver. We offer top notch solutions well within the stipulated time as given by the clients. Our solutions are always well within the budget of our clients we serve. Since the time of our establishment in the year 2004, we have been crossing milestones after milestones of success. Today, we are a big team with 120+ professionals, ready to work wholeheartedly to help the clients accrue on success in their business operations.

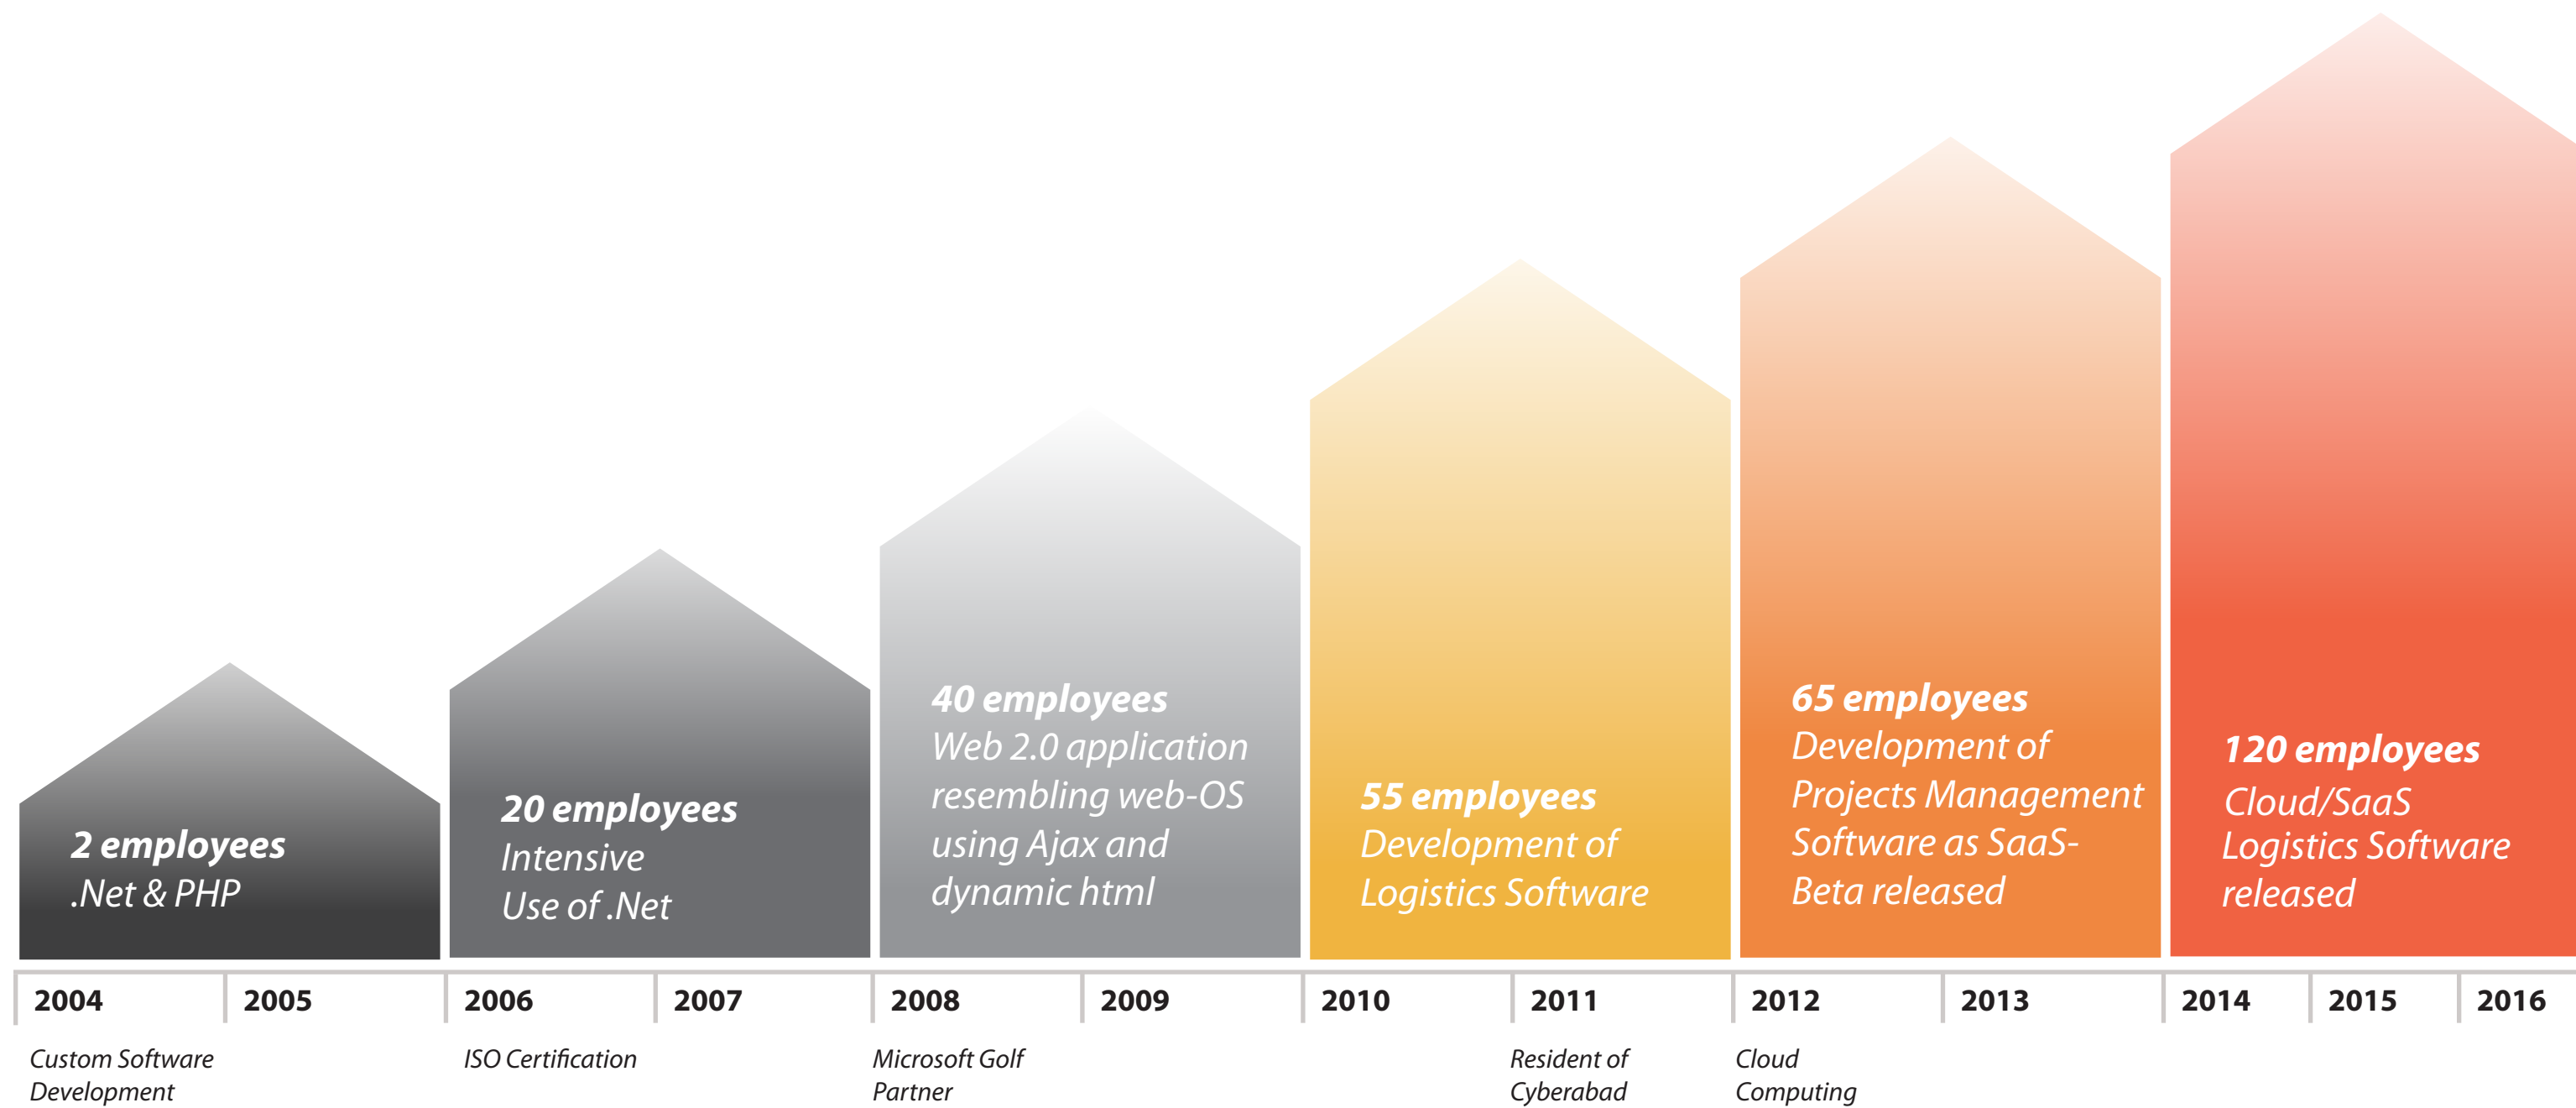

Price and Quality Equilibrium

We, IbleSoft, always focus on offering for our clients the most cost-effective solutions. By relying on us for IT business or software development services, clients can curtail their IT investment costs by 40% or more. We deliver solutions as per the timeline of our customers.

No existence of barriers in communication

We speak our client's language. Just get in touch with us and do let us know of what you require. We will always have a solution for you.

It has been over 11+ years and IbleSoft has been the same in delivering the services which replicate excellence in quality. We have crafted for ourselves an enviable position in the market as a trusted software development or IT solution providers via our dedication and innovativeness in work we deliver. With a team of IT professionals who are au fait in use of the latest IT technologies, we strive to turn the vision of our clients into a reality and continue to help them gain success in their business.

IbleSoft has over 11+ years of experience in delivering the most trusted software development or IT solutions for the clients, belonging to diversified business sectors.

We have been working for clients with a single mission that is to enhance our client's business operations through our quality business solutions.

Custom Web Application Development

Since the time of our establishment, we have been effectively using latest technology tools to implement innovativeness in custom web application solutions we offer. We focus on the use of .NET and PHP and other inseparably requisite technologies such as HTML 5.0 , CSS 3.0, Ajax, Codeigniter, jQuery, Bootstrap, Angular JS, etc.

Magento E-commerce Development

We offer the most comprehensive eCommerce development solutions for all- size businesses Start-ups \ Mid- sized \ Big Brand stores. We offer eCommerce development solutions based on Magento as it is one of the most successful eCommerce platforms, dominating about 40% of the market share. Our Magento eCommerce Solutions can perfectly fulfil your eCommerce requirements.

SaaS Framework Development

For rapid enhancement in cloud computing, SaaS has been a major success- booster. The growth of Software as a Service really has a greater impact on the IT business world than any other IT wave. This same has forced organizations to look for the most cloud-centric IT solutions. IbleSoft's SaaS Solutions can enable the organizations to leverage their business operations. With our expertise in delivering SaaS Solutions, it can be much easier for the organizations to build, manage, monitor their cloud solutions.

Windows Communication Foundation (WCF) Development

With a unified programming model like Windows Communication Foundation (WCF), IbleSoft, develops the most service-oriented applications for the clients. We have a huge amount of experience in catering to varied techno-functional requirements of our clients. We build, configure, deploy solutions as required by the clients.

Mobile Application Development

We, IbleSoft, have unparalleled expertise in designing and developing mobile applications (Android App / iOS | iPad | iPhone App / BlackBerry App / Windows Phone 8 Apps). We put to use not just the latest technology but let our innovation come at the front to deliver the most user-friendly, trend- setter mobile applications.

Project Management Software is very important to manage your operations. In any company Basic operations are Managing Resources, Managing Projects, Managing Tasks, Managing to do, HR, Lead Management, Customer Management, Accounting and Legal. Vivek PM will do all these in one place to reduce the Communication gaps and work more efficiently.

Customer Geography

We serve our clients no matter where they are from. Geographical barriers never come in between us and our clients we serve. We are always able to maintain constant communication and strive to be available for our clients whenever they want us to. We always keep our clients updated during their project development.

We always take up an innovative approach to what our clients require and proceed to work on the same within the framework of project-specifications, to ensure deliverance of successful solutions. Just send us an email stating your business requirements and will let you get the best solutions at such minimal costs you can t even imagine of.

Frequently Asked Questions

How to start?

Making a start is easier. Just send us an email stating what you are looking for. We never keep our customers waited for too long. We usually reply to emails we receive much sooner than our clients can expect. We will look into your requirements and come up with a well-defined plan for the execution of your project. We will send you the details related to how much time we may take to complete your project or what we need more from you or about the estimated cost etc.

Depending upon your requirements, we will develop a prototype of your project and on approval from your end (as we are always sure of it), we will start working on it and we will charge only for what we do for you. We always expect feedback, suggestions or recommendations from our clients ..

I am looking forward to establishing a partnership with IbleSoft, can this be possible?

We, IbleSoft, offer companies to get associated with us. Small organizations can employ the best talented software engineers and can able to develop large projects by reselling our services. By charging minimally lower and by outsourcing a part of their task to us, business owners can gain huge benefits.

Communication

Business owners really think a lot whenever they have to outsource a part of their operations or whole of the operations to a company, separated by geographical barriers. Often projects have not been outsourced by the companies just because of the possibility of the miscommunications. The effectiveness of the communication really plays a vital role. Perceiving the importance of the quality communication, we, IbleSoft, do our level best to keep up reliable communication processes with our clients during entire project development.

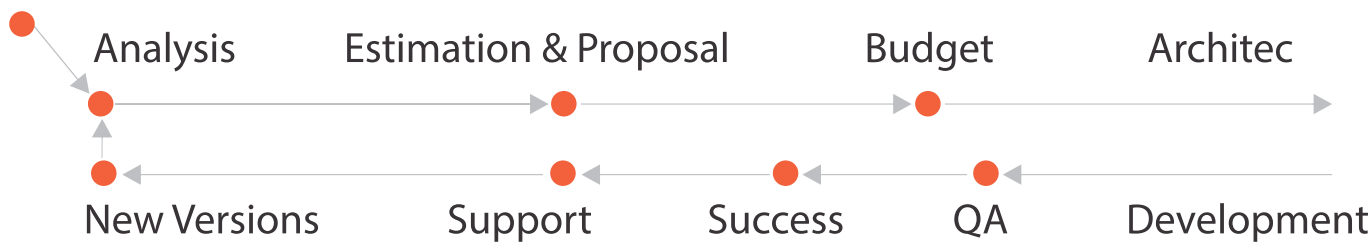

We put to use virtually all means of communication so as to root out the inconsistencies or the flaws in project development which often arise due to improper communications.

- *E-mail and post (serves for more or less formal messages or document exchange);*
- *Project Management Systems (JIRA, dotProject, etc.);*
- *Versioning Systems (Subversion, git, Mercurial, even CVS - whatever you like);*
- *Bug Tracking Systems (Bugzilla, etc.);*
- *Reporting Systems (for keeping track on what's going on and for billing purposes);*
- *Regular phone/Skype calls*
- *Instant Messengers (Skype);*

We even have a visiting scheme. Our customers can have the option to meet our expert engineers during the project life cycle several times or anytime they would like to meet.

Working on various projects, we have acquired a great wealth of experience and have learnt to come up with the most customized working methodologies. We are happy with any working model which can be convenient for our clients. We will work the way the customers would like us to. We always adopt a flexible approach to take up any workflow preferred by our clients.

Methodologies

We adopt an elementally innovative approach to projects we undertake. We use the most effective Waterfall Method of Software Development and other result-oriented methodologies such as Agile, Scrum and Karban Software Development Methodologies.

Waterfall Development Method is suitable much more for small and medium- size projects. Different steps that undergo the method are as follows:

Structuring the concept

We design and develop the solution based on clear-cut understanding of the requirements from our clients. We implement the best technology to provide A1 solutions.

Prototyping

We prototype your requirements and take the approval for further implementation of our expertise and innovation.

Support

We provide 24/7 support services for our clients.

Testing

We test before we deliver the projects so as to eliminate possible inefficiencies or flaws.

Maintaining Constant Contact

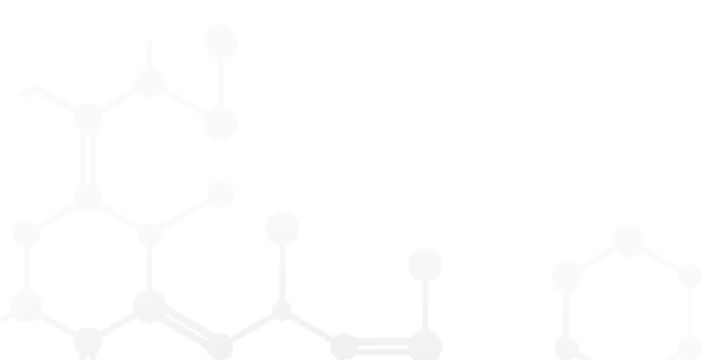

We maintain constant contact with our clients throughout the process.

Maintain

We provide quality management services for quality results.

Agile, Scrum, Kanban, etc. methodologies have their own distinctive features:

- Speeding up software system commissioning;
- Minimizing development iteration cycles;
- Reduced periods of feedback between market/user requirements and functions implementation;
- Iteration-based approach and adaptive production methods;
- Retrospective procedures allow to fix defects promptly and enhance productivity and quality.
